

UPLIFT DESK®

COMPETITORS

INVERTED LEG

Allows for stability wedge, which minimizes lateral, side-to-side movement

STABILITY
WEDGE

NO
STABILITY
WEDGE

NON-INVERTED LEG

Does not allow for wedge, which decreases overall stability

UPLIFT DESK VS. COMPETITORS

At UPLIFT Desk, we're committed to bringing you the best possible standing desk experience and refuse to cut corners in our design or engineering. That's why we include small, thoughtful details, which make our desk sturdier than the competition.

Dual, integrated upper crossbars and a stability wedge offer hidden support and reduce side-to-side motion without restricting your accessory placement. Our frames' inverted columns make this possible, giving you more room under your desk without sacrificing stability. It's just one way we ensure everything comes together into an industry-leading design you can get behind.
